

Please disregard the NAB's petition 04-160 to block XM Radio from providing quality useful services that I pay for and that XM Radio provides with complete integrity and fairness to everyone including other companies/ competitors. There is no reason for this. This is a completely unacceptable issue for the FCC to be paying any attention to what so ever. The NAB is clearly trying to buy out politicians to get their way because some people prefer XM's services instead of the services the NAB represent.

What does the government care about more, getting money for itself or doing its job fairly and honestly?

Resist greed
